Introduction

The Imagineer Systems License Manager for mocha allows you to run floating licences for mocha across a network.

This License Manager is required if you need to activate floating licenses for mocha version 4.0.0 and above. You do not need a License Manager to install node-locked licenses. These can be activated directly in the mocha application.

New Features Guide

License Manager 1.3.0 adds additional features to run floating licenses for mocha version 4.0.0 and above.

New features include:

- Windows installer now adds Windows Firewall exceptions for Private and Domain network connections

Fixed Issues

There are no additional fixed issues in this release.

Known Issues

Issue:	DE2622: The Unix License Manager leaves the previous license service running
Platform:	OS X and Linux
Bug Description:	When upgrading the License Manager, the service for the previous version of the License Manager is not uninstalled and continues running.
Workaround:	Stop the License Manager service before installing the License Manager. After upgrading, re-start the License Manager service.
<hr/>	
Issue:	DE1759 There is no message about the inability to start the server without elevated privileges on RHEL
Platform:	Linux
Bug Description:	The previous server status will show in Server tab but there are no messages in the description field if the user is not running with elevated privileges.
Workaround:	None

Software Requirements

Operating System

- **Mac:** OS X 10.7.x or higher, on Intel. PowerPC is not supported.
- **Windows:** Windows XP Professional SP2 or higher, Windows Vista Business or Ultimate, Windows 7, Windows 8 on x64.
- **Linux:** Red Hat Enterprise Linux 5, CentOS 5, or a compatible Linux distribution on x86_64.
